

MOHAMMAD BILAL

Lucknow, India | +91-7054111476 | [Portfolio](#) | mohammadbilal.mail@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Full-stack developer focused on building developer tools and scalable backend systems. Experienced in React, Next.js, TypeScript, and Node.js, with a strong emphasis on system design, performance, and developer experience.

EDUCATION

Dr. APJ Abdul Kalam Technical University <i>B.Tech in Computer Science</i>	Lucknow, India Oct 2021 – Aug 2025
Christ Church College <i>Intermediate (ICSE)</i>	Lucknow, India Apr 2017 – Feb 2019

EXPERIENCE

Software Developer (Full-time, extended from internship) <i>RealtyPlus, Zambia (Remote)</i>	Aug 2025 – Oct 2025 <i>Remote</i>
– Developed CMS, dashboards, and internal tools from scratch with React, Firebase, and Node.js. – Refactored legacy code, reducing API response time by 35% and improving maintainability. – Led frontend architecture decisions for new modules, ensuring consistent design and scalability. – Coordinated async across remote teams, ensuring clear communication and end-to-end ownership of features.	
Software Developer Intern <i>RealtyPlus, Zambia (Remote)</i>	Nov 2024 – Mar 2025 <i>Remote</i>
– Built and maintained a property listing system using React and Firebase, improving feature delivery speed by 25%. – Integrated Firebase Auth and database for secure agent uploads and real-time updates. – Improved load times and UI performance across 10+ production pages. – Collaborated with cross-functional teams from the UK, US, and Zambia to deliver client-ready releases under tight deadlines.	

TECHNICAL SKILLS

Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS
Backend: Node.js, Express.js, Fastify, Firebase, MongoDB, PrismaORM
Mobile: React Native, Expo
Languages: JavaScript, TypeScript, Java
Testing & Cloud: Vitest, Cloudinary, AWS (S3, EC2)
Tools: Git, VSCode, Docker, Postman
CS Fundamentals: Data Structures, DBMS
Interest Areas: UI/UX Design, AI/ML, System Design

PROJECTS

Textwind NPM Tailwind CSS, TypeScript, Plugin Architecture, Design Systems	2026
– Built a complete fluid typography system for Tailwind CSS with inline scale modifiers and zero-config setup. – Implemented responsive typography utilities with dynamic interpolation, optical tracking adjustments, and non-linear easing curves. – Designed 11 semantic typography primitives including display, heading, body, caption, overline, and code styles with hierarchical font tokens. – Engineered Tailwind v3 and v4 compatible plugin architecture supporting arbitrary modifiers, opacity utilities, and scalable theme customization.	

Orchera | [Visit](#) | TypeScript, Node.js, Fastify, Scalable Architecture, DAG Engine, System Design 2026

- Built a visual backend execution engine where APIs are defined as computation graphs instead of traditional server code.
- Designed and implemented a runtime for scheduling graph nodes, managing dependencies, and executing workflows as HTTP endpoints.
- Engineered a scalable execution model inspired by DAG schedulers and serverless runtimes.
- Built a marketplace for reusable backend workflows, enabling developers to share and deploy APIs.

Motion on Native | [NPM](#) | React Native, Reanimated 2025

- Built a Framer Motion-like animation library for React Native on top of Reanimated 3.
- Implemented declarative animation APIs including `initial`, `animate`, `exit`, and `spring/timing` transitions.
- Supported multiple core React Native components with layout and style animations.

Debatrrix | [Visit](#) | Next, React Native, Prisma, Express, Node, Gemini API 2025

- AI debate simulation platform featuring AI vs AI debates with customizable personalities.
- Designed swipe-based navigation and a modern UI inspired by iOS/Material You, improving user retention.
- Built backend with Node, Express, and Prisma (SQL) for dynamic prompt management and real-time results.
- Handled Cloudinary uploads and Firebase Admin integration for data management and authentication.

ResumeIQ | [Visit](#) | Next, Firebase, Express, Node, Gemini API 2025

- AI-powered resume reviewer with real-time LaTeX preview, PDF export, and credit-based analysis system.
- Built backend using Express and Firebase Admin for secure authentication and structured storage.
- Optimized data handling and UI responsiveness, reducing load time by 40%.

Clarity | AI-first Screenshot Manager | React Native, React Native Reanimated, Expo, SQLite, Node.js, AWS Bedrock (Nova Lite)20

- Designed and built an AI-first mobile app that automatically organizes screenshots using on-device storage and locally persisted AI metadata.
- Implemented AI-powered description, summary, tagging, category classification, and quality assessment for screenshots.
- Built a privacy-first architecture where screenshots remain local and only metadata is processed and stored.
- Developed Google Photos-style category views, masonry grid layouts, and semantic search over local SQLite data.

Personal Portfolio | [Visit](#) | React, Tailwind, Framer Motion 2024

- Developed fully responsive portfolio site from scratch using React and Framer Motion animations.
- Improved navigation flow and visual feedback, leading to smoother user interaction and 100% Lighthouse performance score.
